# Product Requirements Document (PRD)

## Project Name: Finot

Digital Platform for Gibi Gubae

**Author:** hiruy Team

**Date:** March 2026

# 1. Introduction

### 1.1 Overview

Finot is a web-based digital platform designed to modernize Gibi Gubae activities. It replaces paper records, Google Forms, and Excel sheets with a secure centralized system for managing students, donations, service groups, and community engagement.

### 1.2 Purpose

The system aims to:

- Digitalize student records
- Manage donations transparently
- Enable anonymous counseling and Q&A
- Organize service groups

### 1.3 Intended Audience

- Students
- Administrators
- Mentors
- Community Leaders
- Donors

# 2. Problem Statement

Currently, Gibi Gubae uses:

- Paper documents
- Google Forms
- Excel sheets

These cause:

- Data loss
- Poor organization
- Difficulty in tracking members

Finot provides a digital solution.

# 3. Goals and Objectives

## Main Goal

To build a centralized digital management platform.

## Objectives

- Online registration
- Secure login
- Profile management
- Donation system
- Anonymous Q&A
- Service group selection

# 4. System Scope

## 4.1 In Scope

- Welcome website
- Registration & Login
- Profile dashboard
- Donation system with payment integration
- Q&A system
- Service group management

## 4.2 Out of Scope

- Mobile application
- Offline mode
- Calendar integration

# 5. Stakeholders

- Students
- Service Group Admins
- Master Admin
- Donors
- Organizers

# 6. User Roles

| Role | Description |
|---|---|
| Student | Registered member |
| Service Admin | Manages service groups |
| Master Admin | Controls entire system |
| Guest | External visitor |

# 7. Functional Requirements

## 7.1 Authentication

- Register
- Login (Student/Admin)
- Logout
- Password encryption

## 7.2 Student Management

- Profile creation
- Profile editing
- Photo upload
- Status management

## 7.3 Donation System

- Internal donation
- External donation
- Payment integration (Chapa)
- History tracking

## 7.4 Anonymous Q&A

- Anonymous posting
- Nickname usage
- Answer system
- Admin moderation

## 7.5 Service Group Selection

- View service groups
- Rank preferences
- Admin assignment

# 8. Non-Functional Requirements

### Performance

- Fast loading
- High availability

### Security

- Encrypted passwords
- Role-based access

### Usability

- Mobile responsive
- Simple interface

### Reliability

- Data backup
- Error handling

# 9. System Pages

### 9.1 Welcome Page

- Description of Gibi Gubae
- About Finot
- Image
- Login/Register buttons
- Donation & Q&A buttons
- Footer with social links

## 9.2 Registration Page

Collects:

- Personal info
- Contact info
- Emergency contact
- Church experience

## 9.3 Profile Dashboard

- Personal data
- Events
- Notifications
- Sidebar navigation

## 9.4 Login Page

- Student/Admin login
- Redirect to dashboard

## 9.5 Donation Pages

- External donation
- Internal donation
- History view

## 9.6 Anonymous Q&A

- Ask questions
- View answers
- Participate anonymously

## 9.7 Service Group System

- Group details
- Ranking form
- Admin assignment

# 10. Technical Requirements

### Frontend

- Tailwind CSS
- HTML
- CSS
- JavaScript
- React

### Backend

- django

### Database

- PostgreSQL

### Payment

- Chapa API

### Version Control

- Git & GitHub

# 11. Database Design (Summary)

### User Table

Stores personal ,  academic, and contact information.

### Service Group Table

Stores service group details and admins.

### Donation Table

Stores donation transactions.

### Q&A Table

Stores anonymous questions and answers.

## 12. Success Criteria

- Users register successfully
- Login works correctly
- Donations are processed
- Profiles load properly
- Admins manage content

## 13. Future Improvements

- Mobile app
- SMS alerts
